

Turf for Surf

DSRT Surf is paying to convert 24 acres at Desert Willows golf courses into drought tolerant landscaping which will result in annual water savings of 34.8m gallons. The DSRT Surf lagoon will use 23.8m gallons of water each year through an annual lagoon drainage/refill, daily water filtration, and evaporation. Much of this water will be reclaimed through dry wells which recharge the aquifer effectively recycling our water back into the system.

+  **34.8m**
Gallons Saved by Landscape Conversion, paid for by DSRT Surf

-  **23.8m**
Gallons Used by the Surf Lagoon

=  **11.0m**
Gallons of Water Saved!
